

# Mira Finance

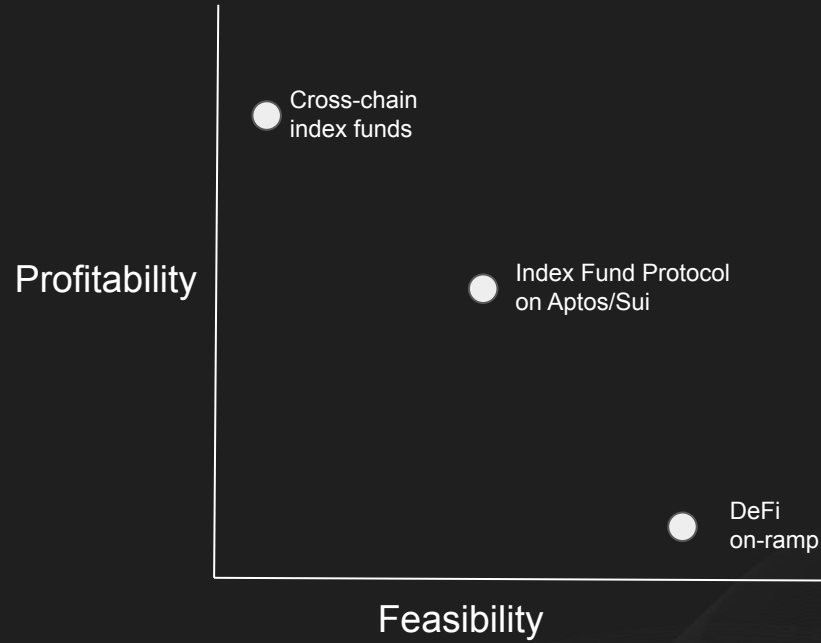

Building the Next Generation of Index Investments on Aptos & Sui

# What we do

- Cross-chain In-house index tokens
- Composable Index Platform for institutions and individuals to create their own funds that can be public/private
- On ramp to DeFi applications with our partners
- Treasury management

# Market Fit

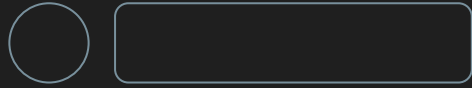

# Cross-Chain Indices

- Mira will provide capitalization weighted indices consisting of 5-20 tokens available on Aptos, Eth, Solana, and other chains through LayerZero and Axelar
- Indices will track projects in sectors ranging from Layer 1's, DeFi, Wireless, Web3.0, and more
- Weighted based on the value of each token's circulating supply.

# How Index Creation Works

1. Fund manager generates an index with their selection of tokens and defi strategies (% allocation, leverage)

2. Investor selects options (whitelisting, private/public, rebalance period).

3. A vault/pool that contains all strategies selected by fund manager is created and depicted as an index

4. Index can named, shared, and searched on the Mira Dapp (KYC will be needed)

# More Than Just a Fund

Mira will act as an onramp to other DeFi products on Aptos with:

- Liquid Staking (Ditto Finance)
- Liquidity farming (Satay & Arco Protocol)
- Swaps (Pontem Network)
- Launchpad (Meeiro)
- Leverage (Tsunami Finance)
- Lend and Borrow (Superposition)
- Auto-investing (in house)
- Liquidity Pools (in house)

# Revenue Model

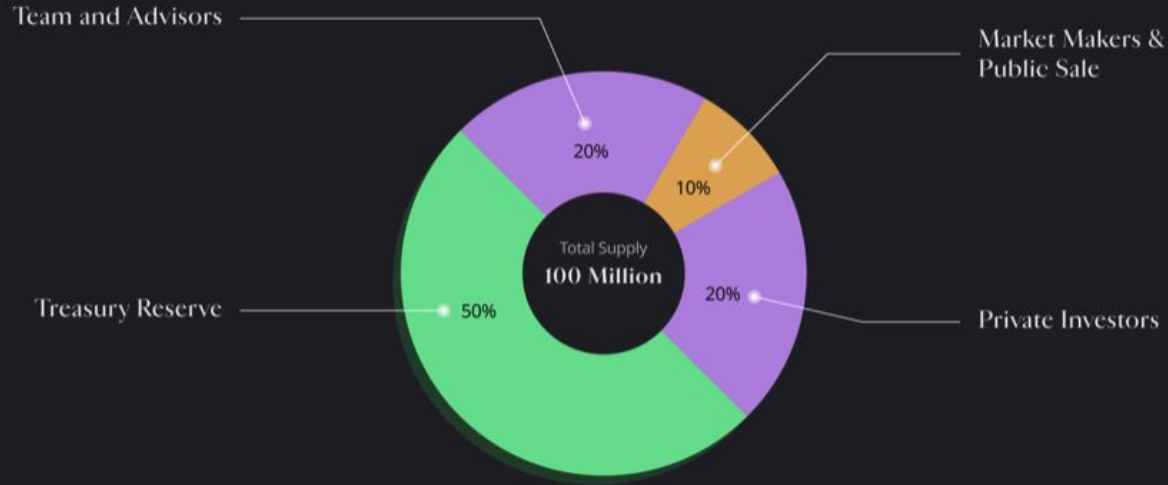

- **Transaction fees from our indices**
  - index tokens will have a 0.95% streaming fee
- **\$MIRA Governance Token**
  - \$MIRA holders may vote on smart contract upgrades, new products, treasury allocation, etc
  - Profits from composed indices will be given as \$MIRA
  - Index creators will be incentivized to add and hold \$MIRA
  - Specific # amount of \$MIRA will be needed to create a pool
- **Payment for order flows from transaction flows to DeFi Partners**

# Competitors

Competitor	Blockchain	Cross-chain index	Custom Index	DeFi On-ramp	TX Cost
INDEX CO-OP (DeFi Pulse)	ETH	✗	✗	✗	High
Ark Finance	ETH	✗	✗	✗	High
Hord Finance	ETH	✗	✓	✗	High
Dhedge	ETH	✗	✓	✗	High

# Token Allocation

- 6 month investor lockup 2 year vest
- 8 month team lockup 2 year vest

# Roadmap

## Q3 & Q4 2022

Product Development, Testnet & Feedback, Simulations, Completed Funding Round, and Series of Audits

## Q1 2023

Mainnet Launch, Meta Governance, and Dapp Onramp to Other Protocols

## Q2 2023

Public Token Launch and Social Media/Referral Rewards Incentivization

# The Mira Platform

- Establishing cross-chain crypto indices will bring traditional investors to Defi with a product they are familiar with and want
- Being available to institutional investors with KYC/AML and compliance with the SEC and CFTC
- Helping organize a community where users can exchange information, research cryptocurrencies, compete in performance, share, manage their wallet.
- Making the Mira wallet versatile so that users keep their funds on Mira

# Team

## Andrew Capasso

Co-Founder/ CEO

Former director of internal development at the American Blockchain Initiative- a lobbying firm educating US policymakers on cryptocurrency to improve regulatory clarity

## Alex Allaire

COO

Former Industry Affairs Associate at the Blockchain Association- A DC based crypto lobbying firm

CEO of the American Blockchain Initiative- a lobbying firm educating US policymakers on cryptocurrency to improve regulatory clarity

## Nirel Gershwind

Co-Founder/ CTO

Former REU Blockchain Researcher - implemented a Merkle DAG Blockchain in python as a novel solution for mobile wireless sensor networks

Advisor

## Sam Thapaliya

Founder / CEO AT Zebec  
(a continuous settlement protocol)
